REMEDIAL MEDICAL SERVICES Inc.

Office Address Line 1, Comes Here... Tel: 132 124 1222

IMPRESSION PLAN

| Decreased Rom | Patient may have limited mandibular range of motion |
|---------------|---|
| Hernia | Patient may have a protrusion of abdominal structures through the retaining abdominal wall. It involves two parts: an opening in the abdominal wall, and a hernia sac consisting of peritoneum and abdominal contents. Abdominal hernias include groin hernia (hernia, femoral; hernia, inguinal) and ventral hernia. |
| Night Sweats | Patient may have an excessive sweating. In the localized type, the most frequent sites are the palms, soles, axillae, inguinal folds, and the perineal area. Its chief cause is thought to be emotional. Generalized hyperhidrosis may be induced by a hot, humid environment, by fever, or by vigorous exercise. |

Advanced Care Planning: Advanced care planning with patient, time spent 15 minutes. Reviewed care plan options such as code status, intubation and hospitalization. Reviewed risks of cardiac resuscitation including rib fracture. Reviewed prolong life expectancy and benefit to aggressive care and treatment.

Orders: AS ATTACHED Discussion Notes:

Current condition, medication regimen, plan of care as above discussed. Continue current medications and plan of care. Frail elderly, on medications requiring regular monitoring. Follow labs closely. Medications prescribed using electronic prescribing system. I verify that a total of **20 Minutes** was spent on this encounter by the Nurse Practitioner directly. Follow-up visit mentioned in plan.

HIPAA PERMITS DISCLOSURE OF POLST TO OTHER HEALTHCARE PROVIDERS AS NECESSARY

Physician Orders for Life-Sustaining Treatment (POLST)

First follow these orders, then contact physician. A copy of the signed POLST form is a legally valid physician order. Any section not completed implies full treatment for that section, POLST complements an Advance Directive and is not intended to replace that document.

One

CARDIOPULMONARY RESUSCITATION (CPR): If patient has no pulse and is not breathing. If patient is NOT in cardiopulmonary arrest, follow orders in Sections B and C.

✓ Attempt Resuscitation/CPR (Selecting CPR in Section A requires selecting Full Treatment in Section B)

MEDICAL INTERVENTIONS: If patient is found with a pulse and/or is breathing.

- ✓ Full Treatment primary goal of prolonging life by all medically effective means.
 - In addition to treatment described in Selective Treatment and Comfort-Focused Treatment use intubation, advanced airway interventions, mechanical ventilation, and cardioversion as indicated.
 - ✓ Trial Period Of Full Treatment
- Selective Treatment goal of treating medical conditions while avoiding burdensome measures.
 - In addition to treatment described in Comfort-Focused Treatment, use medical treatment, IV antibiotics, and IV fluids as indicated. Do not intubate. May use non-invasive positive airway pressure. Generally, avoid intensive care.
 - ✓ Request Transfer To Hospital only if comfort needs cannot be met in current location.
- Comfort-Focused Treatment primary goal of maximizing comfort.

Do Not Attempt Resuscitation/DNR (Allow Natural Death)

Relieve pain and suffering with medication by any route as needed; use oxygen, suctioning, and manual treatment of airway obstruction. Do not use treatments listed in Full and Selective Treatment unless consistent with comfort goal. Request Transfer To Hospital only if comfort needs cannot be met in current location.

Circle "Yes" or "No" for each statement below

Why it matters

| | DEIOW | | |
|--------------|-------------|---|---|
| Yes | ✓ No | I often feel sad or depressed. | Symptoms of depression, such as not feeling well or feeling slowed down, are linked to falls. |
| Yes | ✓ No | I take medicine to help me sleep or improve my mood. | These medicines can sometimes increase your chance of falling. |
| Yes | ✓ No | Sometimes I feel unsteady when I am walking | Unsteadiness or needing support while walking are signs or poor balance. |
| Yes | ✓ No | I need to push with my hands to stand up from a chair | This is a sign or weak leg muscles, a major reason for falling |
| Yes | ✓ No | I steady myself by holding onto furniture when walking at home. | This is also a sign of poor balance. |
| ✓ Yes | □No | I am worried about falling. | People who are worried about falling are more likely to fall. |
| Yes | ✓ No | I take medicine that sometimes makes me feel light- headed or more tired than usual. | Side effects from medicines can sometimes increase your chance of falling. |
| Yes | ✓ No | I use or have been advised to use a cane or walker to get around safely. | People who have been advised to use a cane or walker may already be more likely to fall. |
| Yes | ✓ No | I have fallen in the past year. | People who have fallen once are likely to fall again. |
| Yes | ✓ No | I sometimes have troubles stepping up onto a curb. | This is also a sign or weak leg muscles. |
| Yes | ✓ No | I have lost some feeling in my feet. | Numbness in your feet can cause stumbles and lead to falls. |
| Yes | ✓ No | I often have to rush to the toilet. | Rushing to the bathroom, especially at night, increase your chance of falling |

Total 1 Add up the number of points for each "yes" answer. If you scored 4 points or more, you may be at risk for falling. Discuss this check list with your doctor.

This checklist was developed by the Greater Los Angeles VA Geriatric Research Education Clinical Center and affiliates and is a validated fall risk self-assessment too (Rubenstein at al. J Safety Res; 2011:42(6)493-499). Adapted with permission of the authors.
